Community & your public page

Give your clients a space to share wins and support each other, connect with other nutritionists, and get a public page for new clients.

Where to find it: Community and Public page in the left menu (under Grow)

IN THIS GUIDE

1 Community (Growth and Scale Pro)
2 Post to your practice
3 Groups (cohorts)
4 Nutritionist network
5 Your public page

Updated 12 October 2026 · nusi.in

1 Community (Growth and Scale Pro)

The first time you open Community, read the guidelines and click Accept & enter community. The top of the page shows posts, comments and how many clients are engaged. There are two views:

- **My practice:** a private feed for you and your clients.
- **Nutritionist network:** a feed shared with all nutritionists on NUSI. Your clients can't see it.

2 Post to your practice

1. In **My practice**, type in the box ("Share an announcement, a win, a question…").
2. Add a photo if you like (up to 8 MB) and a hashtag.
3. Tick **Pin to top** for important announcements.
4. Click Post.

- Clients can like and comment, and post themselves (up to 1,000 characters).
- Use a post's menu to pin, unpin or delete it.
- **Trending** and **Moderation** on the right help you keep an eye on activity.

3 Groups (cohorts)

Create a group for a batch of clients, for example "January Challenge". Clients can join or leave groups from their app. Deleting a group moves its posts to the main feed.

4 Nutritionist network

Share ideas and questions with other practitioners on NUSI. Follow people to see their posts. Everything you post here is **visible to all practitioners**.

5 Your public page

A free page for new clients at **nusi.in/your-name**, good for your Instagram bio or WhatsApp status. Open Public page (or **Settings → Public page**):

1. Choose your **Public URL slug** (the "your-name" part; it must be unique) and click Save slug.
2. Write a **Headline** (up to 120 characters) and **Bio** (up to 2,000 characters).
3. Click Add link for WhatsApp, Instagram, YouTube, your website or a booking link. Drag to reorder.

4. Turn on **Show "Join my practice"** so visitors can request to join.
5. Turn on **Publish page** and click `Save public page`.
6. Use `Copy` and `Open` to share and check it.

> **TIP**
> Get verified in **Settings** → **Verification** to show a **Verified** badge on your page.

> **GOOD TO KNOW**
> When **Publish page** is off, visitors see "not found".
