What your clients see (the NUSI app)

How clients join your practice, log their meals with a photo, follow their plan, answer forms, book sessions and chat with you.

Where to find it: The NUSI app on the client's phone (or the client portal on nusi.in)

IN SHORT

Knowing the client side helps you guide new clients. Everything they do arrives in your NUSI account straight away.

IN THIS GUIDE

1 Joining your practice
2 First-time setup
3 The app's main tabs
4 Logging a meal with a photo (Plate Vision)
5 Meal plan, programs and habits
6 Assessments
7 Appointments (Growth and Scale Pro)
8 Their settings

Updated 12 October 2026 · nusi.in

1 Joining your practice

1. You send them your join link (Clients → `Share join link`), or create their login yourself (Clients → `Add client`).
2. With the link: they open it, enter **Your name**, **Email** and a **Password**, and tap `Create account & request`. If they already have an account they tap `Request to join`.
3. They wait on a "pending" screen until you approve them (unless you imported their email, in which case they join straight away).
4. In the app they can also paste the invite link.

2 First-time setup

The client answers a few questions: age and gender, height and weight, their goals ("What's driving you?"), activity level, and health notes (allergies, medical conditions, food preferences). Then `Finish & enter portal`. These answers fill the **Profile & health** card on their profile in your account.

3 The app's main tabs

- **Today:** their day at a glance.
- **Meals:** log meals with `Snap` (photo with AI), `Scan` (packaged food barcode) or `Plan` (today's meals from your plan).
- **Assistant:** the AI nutrition assistant (Growth and Scale Pro, if you turned it on).
- **Progress:** weight, measurements and trends.
- **Chat:** messages with you.
- **More:** habits, journal, meal plan, goals, programs, assessments, recipes, measurements, progress photos, files, appointments, community, settings and more.

4 Logging a meal with a photo (Plate Vision)

1. Tap `Snap`, then `Use camera` or `Upload photo`.
2. Optionally add hints: portion size, something for scale, or a note.

3. Tap **Analyze with NUSI**. The foods and nutrients appear.
4. If something is wrong, tap **Not quite right?**, correct it and tap **Redo with this**.
5. Choose the meal time and tap **Log this meal**.

> GOOD TO KNOW
> The meal and photo arrive in your account marked as a photo estimate. Each analysis uses one of your practice's AI credits.

5 Meal plan, programs and habits

- **Meal plan:** shows the week you published. Until you publish one, it says "No meal plan yet".
- **Programs:** the tasks of their program to tick off each day; this drives the progress you see.
- **Habits:** they create habits (e.g. "Drink 2L water") and tick them off daily.

6 Assessments

When you send a form, it appears in their app. They tap **Start**, answer and submit. After you review it, they see **"Reviewed by your nutritionist"** with your note.

7 Appointments (Growth and Scale Pro)

1. They tap **Book a session**, choose the **Type** (Consultation, Follow-up, Quick check-in, Assessment, Group session), the **Mode** (Video, Phone, In person), the time and a note.
2. They tap **Send request**. It shows "Awaiting confirmation" until you approve it.
3. At the time of a video session, **Join video** appears. **Withdraw** cancels a request.

8 Their settings

Clients can update their profile, goals and health details, and change their password (with their current password, or with a reset link by email).
