NUSI

USER GUIDE · PART 1 OF 17

Getting started with NUSI

Create your practice, set it up in three quick steps, and get your first clients into NUSI.

Where to find it: nusi.in → Sign in → Create workspace

IN SHORT

NUSI runs your nutrition practice in one place: clients, programs, meal plans, meal photos with AI, assessments, appointments with video calls, chat and billing. Your clients use the NUSI app on their phone.

Every new practice gets a **14-day free trial** with the Growth features. No payment is needed to start.

IN THIS GUIDE

1 Create your account
2 Set up your practice (3 steps, about 3 minutes)
3 Accept the privacy policy
4 Your first steps after setup
5 Your free trial
6 When the trial ends
7 Finding your way around

Updated 12 October 2026 · nusi.in

1 Create your account

1. Go to **nusi.in** and click Sign in, then choose Create workspace.
2. Enter **Your name**, **Email**, **Phone** (10 digits) and a **Password** (at least 8 characters).
3. Click Create workspace. You can also use Continue with Google.
4. If you signed up with email, open the confirmation email ("Check your inbox to confirm your email") and click the link.

2 Set up your practice (3 steps, about 3 minutes)

1. **Choose a plan.** Pick Starter, Growth or Scale Pro. Every plan starts with a 14-day free trial; nothing is charged now.
2. **Your practice.** Enter your **Practice name**, upload your **Logo** (PNG or SVG, about 256 px) and choose your **Specializations** (add your own with Add custom…).
3. **Verification & tax.** Choose an ID **Document type** (Aadhaar, PAN or Driving licence), enter its number and upload it (JPG, PNG or PDF, up to 5 MB). Add **GSTIN** if you have one, plus **City**, **State** and **Pincode**.
4. Click Create my practice. Your dashboard opens with "Welcome to NUSI".

TIP

Everything you enter here can be changed later in Settings.

3 Accept the privacy policy

The first time you open your practice (and whenever the policy is updated), NUSI shows its privacy policy. Read it and click I accept to continue. You can read it again any time in **Billing** → **Privacy policy**.

4 Your first steps after setup

Step	Where	Guide
Add your first clients	Clients → Add client or Share join link	Clients
Rename your meal times	A client's Meal plan tab	Meal plans

Step	Where	Guide
Build your first program	Programs → New program	Programs
Add an intake form	Assessments → a template → Use template	Assessments
Set your booking hours	Appointments → Booking hours	Appointments
Invite your team	Team → Invite member	Team
Turn on notifications	Settings → Notifications	Settings

5 Your free trial

- Lasts **14 days** from sign-up, with the Growth features.
- Limits during the trial: 50 clients, 5 team members, 500 AI credits a month, 1 GB storage, 5 hours of video calls a month.
- A reminder appears once a day: Choose a plan opens Billing, Keep exploring closes it until tomorrow. In the last 3 days the reminder becomes more urgent.
- Your trial status is always shown in amber at the top of the screen and at the bottom of the menu.

6 When the trial ends

If no plan is chosen, NUSI shows **"Your 14-day free trial has ended"** with two buttons: Choose a plan and Download my data. Your data is kept for 6 months, so you can pick up where you left off after choosing a plan.

> GOOD TO KNOW
> Team members who are not the owner see "Ask the practice owner to choose a plan to restore access."

7 Finding your way around

- **Left menu:** grouped into Clients, Grow and Account. Click the panel icon at the top to collapse it into a slim icon bar (Expand opens it again). NUSI remembers your choice.
- **Green top bar:** Back, your practice and the page you are on, your trial or plan, refresh, light/dark mode and notifications.
- **Help & guides:** search NUSI's guide and your own documents any time.
- **Language:** switch between English and Tamil in **Settings → General**.

Your dashboard (Overview)

The first screen you see each day: how your practice is doing, who needs you, what is coming up, and how much of your plan you have used.

Where to find it: Overview in the left menu

IN SHORT

The dashboard brings the most important numbers of your practice onto one screen. Every tile can be clicked to go straight to the details behind it.

IN THIS GUIDE

1 The greeting line
2 The six tiles
3 See where your AI credits went
4 See what is using your storage
5 Needs attention
6 Upcoming sessions
7 Plan allowances at a glance

Updated 12 October 2026 · nusi.in

1 The greeting line

At the top you see today's date and a greeting with your name, followed by a short summary such as **"Green Leaf Nutrition · 12 clients · 8 active this week"**.

"Active this week" counts clients who logged at least one meal in the last 7 days.

TIP

The All clients button on the right opens your full client list.

2 The six tiles

Tile	What it shows	Click to
Active clients	Clients who are currently active, out of all your clients	Open your client list
Active programs	How many program enrolments are running, and their average progress	Open Programs
Needs a nudge	Clients at risk (no meal logged in 10 days)	See only the at-risk clients
Your plan	What you pay each month, or how many trial days are left	Open Billing (owners only)
AI credits	AI credits used this month out of your allowance, e.g. 53/500	See where your credits went
Storage	Space used by photos, files and documents, e.g. 417 KB/1 GB	See who uses the storage

GOOD TO KNOW

A client is "at risk" when they are active but have not logged a meal for 10 days, or have never logged one. It is a gentle signal to check in, not a judgement.

3 See where your AI credits went

1. Click the AI credits tile.
2. The panel shows your credits used this month and when they reset (the 1st of each month).

3. **What it was used for** lists each AI feature (Plate Vision photo analysis, Estimate with AI, AI meal plan drafts…) with its count.
4. **Who used it** lists each person: clients, team members, or "Automatic (NUSI)" for jobs NUSI runs on its own.
5. **Recent activity** shows the latest 30 AI actions with the time.

> GOOD TO KNOW
> Each AI action uses one credit. If an AI action fails, it is marked **"Failed · not charged"** and does not use a credit.

> GOOD TO KNOW
> The bar turns amber at 75% and red when the allowance is used up. You can buy extra credits from Billing → Top-ups.

4 See what is using your storage

1. Click the `Storage` tile.
2. **Who it belongs to** shows the space used for each client, team member and the practice itself.
3. **What kind of files** shows the split between meal photos, progress photos, profile photos, shared files and documents.

5 Needs attention

The **Priority · Needs attention** panel lists up to 6 clients who need a nudge, with their program and when they were last active. Click a client to open their profile, or `Review all` to see every at-risk client. When nobody needs attention you will see **"Everyone's on track"**.

6 Upcoming sessions

The **Schedule · Upcoming sessions** panel shows your next 5 appointments. Click one to open it, or `Calendar` to go to Appointments.

7 Plan allowances at a glance

Plan	Clients	AI credits / month	Storage	Video calls / month
Free trial	50	500	1 GB	5 hours
Starter	100	500	5 GB	Not included
Growth	500	5,000	50 GB	30 hours
Scale Pro	Unlimited	25,000	200 GB	100 hours

> TIP
> Extra AI credits can be bought any time from Billing → Top-ups, without changing your plan.

Clients: adding and managing your roster

Add clients four different ways, approve people who join through your link, and check on anyone at a glance without leaving the list.

Where to find it: Clients in the left menu

IN SHORT

The Clients page ("Your roster") is the list of everyone you coach. On a computer, the list is on the left and the selected client's summary is on the right. On a phone, tapping a client opens their full profile.

IN THIS GUIDE

1 Four ways to add clients
2 Add a client yourself
3 Share your join link
4 Approve people who want to join
5 Import a list of clients (CSV)
6 Find a client
7 The client summary panel
8 Delete a client
9 Who can do what

Updated 12 October 2026 · nusi.in

1 Four ways to add clients

Way	Best for	What happens
Add client	Adding one person yourself	You create their login; they are active straight away
Share join link	Letting people sign up themselves	They sign up and wait for your approval
Import	Bringing an existing list (CSV)	Their emails are pre-approved for when they sign up
Approvals	People who used your join link	You approve or decline each request

2 Add a client yourself

1. Click Add client at the top right.
2. Enter the client's **Name** and **Email**. A **Temporary password** is created for you (click the refresh icon for a new one; at least 8 characters). **Phone** is optional.
3. Click Add client.
4. The **Client added** screen shows their email and password. Click Copy all login details and send them to the client (for example on WhatsApp), then click Done.

GOOD TO KNOW

The password is shown only once, so copy it before closing.

GOOD TO KNOW

No email is sent automatically; you share the login details yourself. The client can change their password later in their app.

GOOD TO KNOW

Adding a client uses one client seat of your plan.

3 Share your join link

1. Click `Share join link`.
2. The first time, click `Generate join link`.
3. Click `Copy` to copy it, or `Share on WhatsApp` to send it directly.
4. Anyone who signs up through the link appears in your approval queue.

- One link works for your whole practice. It expires after 30 days; the expiry date is shown under the link.
- `Rotate` creates a new link and stops the old one immediately (useful if the link was shared too widely).
- `Turn off` stops new sign-ups until you generate a link again.

4 Approve people who want to join

When someone signs up through your link, a panel **"N people want to join"** appears at the top of the Clients page. Each person has `Approve` and `Decline` buttons.

> GOOD TO KNOW
> Approving uses a client seat. Declined people move to a **Declined** filter, which appears once you have declined someone.

5 Import a list of clients (CSV)

1. Prepare a CSV file with the columns **name**, **email** and **phone**. Email is required.
2. Click `Import`, then `Choose CSV file`.
3. Check the preview, then click `Import N`.
4. The result shows how many were imported and why any rows were skipped.

> GOOD TO KNOW
> Importing does **not** create accounts. It pre-approves those emails: when the person signs up with your join link, they skip the approval step. Until then they show as **Pending** with the note "Imported from your list. They haven't signed up yet".

6 Find a client

- **Search** by name, email or program.
- **Filters** with counts: `All`, `Active`, `At risk`, `Paused`, `Pending` (and `Declined` once used).
- **At risk** means active but no meal logged in 10 days.
- `Export` downloads the current list as a CSV file (name, email, phone, status, program, joined, last active).

7 The client summary panel

Click a client in the list (on a computer) to see their summary on the right without leaving the page:

- **Header:** photo (a green dot means online now), status, email and phone, client since, last seen.
- **Buttons:** WhatsApp (if they have a phone number), `Message in NUSI`, download their complete record as a PDF, `Meal plan`, `Open` (full profile) and delete.
- **Meals logged:** the share of planned meals they logged in the last 7 days, and the change from the week before.
- **Program:** name and "Week X of Y". **Weight:** change since their first weigh-in. **Next session:** date and type, or `Book one`.
- **Last 14 days:** one bar per day, meals logged against the plan (green good, amber some, red few).
- **Today's meals:** each meal with its photo, time and calories. Click one to open it.

> TIP
> The list stays in place while only the summary scrolls, so you can move quickly from one client to the next.

8 Delete a client

1. Click the bin icon on the client's summary.
2. Type the client's name to confirm, then click **Delete permanently**.

> **GOOD TO KNOW**
> This permanently erases their meal logs, messages, assessments, photos, measurements, appointments and program history. It cannot be undone. Download their record first if you may need it.

> **GOOD TO KNOW**
> Only the practice owner can delete clients. An imported email that never signed up is removed instantly.

9 Who can do what

- **Owner and nutritionists** can add, approve, import and manage clients.
- **Coaches** only see the clients assigned to them (set the "Assigned coach" on the client's profile).
- Your plan sets how many active clients you can have: 50 on the trial, 100 on Starter, 500 on Growth, unlimited on Scale Pro.

A client's profile

Everything about one client in one place: health profile, meals, measurements, labs, assessments, files, private notes and their complete record as a PDF.

Where to find it: Clients → select a client → Open

IN SHORT

Open a client's profile from the Clients page (Open on their summary, or tap them on a phone), or from the Needs attention list on your dashboard.

IN THIS GUIDE

1 The top of the profile
2 Overview tab
3 Meal plan tab
4 Meals tab
5 Measurements tab
6 Labs tab
7 Assessments tab
8 Files tab
9 Notes tab
10 AI chats tab
11 Download the complete record (PDF)

Updated 12 October 2026 · nusi.in

1 The top of the profile

- Quick facts: **Program**, **Target** (calories), **Last weight**, **Last active**.
- Wellness opens a detailed view of their meals, habits, body, cycle and nutrition audit.
- Message opens Messaging. Download record creates their complete record as a PDF.
- **Assigned coach** (owners and nutritionists only): choose which coach looks after this client, or "Unassigned (whole team)".

TIP

Tabs show a green number when there is something new, for example an assessment waiting for your review.

2 Overview tab

- **Profile & health:** age, gender, height, main goal, activity level, allergies, medical conditions and food preferences, as the client entered them.
- **Nutrition (last 14 days):** average calories and protein per day, and meals logged.
- **Daily habits:** latest water, sleep and exercise.
- **Weight trend:** a chart of the last 90 days (needs at least two weigh-ins).
- **Client's goals:** goals the client set for themselves.

GOOD TO KNOW

This tab is read-only. The client keeps their profile up to date from their app.

3 Meal plan tab

Build and publish this client's weekly meal plan. See the separate guide **"Meal plans"** for every step.

4 Meals tab

Shows the meals the client logged in the last 30 days. Click any meal to open **Meal details**:

- The full photo, meal time, date and time, calories and quantity.
- Protein, carbs, fat and fibre, with their share of calories.
- **On the plate:** each food detected in the photo, with its nutrients.
- **Plate insight:** a short AI summary and suggestions. **Client's note** if they added one.
- **More nutrients:** vitamins and minerals, plus how the meal was logged and the AI's confidence.

5 Measurements tab

Body measurements in inches (chest, waist, hip, arm, thigh), with the change since the previous entry. The client adds these from their app.

6 Labs tab

1. Click `Add result` and enter the **Marker** (e.g. HbA1c), **Result**, **Test date**, and optionally the normal range and the lab.
2. Or click `Import from report` to copy values from a "Lab Results" form the client filled in, then `Import N value(s)`.
3. Turn on **Show only markers outside range** to focus on what needs attention.

> TIP
> Each result can be edited or deleted. Values that could not be read during import are kept as text so you can correct them.

7 Assessments tab

1. Under **Assign an assessment**, click `Health`, `Stress` or `Sleep`, or one of **Your custom forms**.
2. The client fills it in from their app. Its status shows **Awaiting**, then **Completed**.
3. Click `Review` to read every answer and the score (out of 100, with a band such as "Good").
4. Write a **Review note** (the client sees it) and click `Mark as reviewed`.

> TIP
> To build your own forms or use ready-made templates, click `Build & manage`. See the **Assessments** guide.

8 Files tab

- `Share a file` (up to 25 MB): the file appears in the client's app, marked "Shared".
- Files the client uploads are tagged **From client** and marked **New** for 3 days.
- Every file can be downloaded or deleted.

9 Notes tab

Private notes for your team only. They are never shown to the client. Click `Add note`; hover over a note to edit or delete it.

10 AI chats tab

Read the client's conversations with their AI assistant (read-only). If the assistant is turned off, a link takes you to **Settings** → **AI**.

11 Download the complete record (PDF)

1. Click `Download record` at the top of the profile (or the download icon on the Clients page).
2. Wait a few seconds while it says "Preparing PDF…". The file downloads automatically.

- Includes profile, goals, weight and habits (12 months), measurements, every assessment answer, meal plans, meal log (12 months), cycle entries, appointments, private notes, messages and the list of files.
- Photos and file contents are not inside the PDF; download files from the Files tab.
- To download every client at once as a ZIP, use **Settings → Data & privacy**.

> GOOD TO KNOW
> The record contains private health information. Store and share it carefully.

Programs

Build a program once (for example "90-day Diabetes Reversal"), give it to many clients, and track how well each one follows it.

Where to find it: `Programs` in the left menu

IN SHORT

A program is a reusable template made of tasks (walk 30 minutes, log breakfast, weekly check-in). When you assign it, each client gets their own copy and ticks off tasks in their app. NUSI calculates their progress automatically.

IN THIS GUIDE

1 The Programs page
2 Create a program
3 Add tasks
4 Fill in the program details
5 Publish the program
6 Assign it to one or many clients
7 Editing a program clients are already on
8 How progress is calculated
9 Program chat

Updated 12 October 2026 · nusi.in

1 The Programs page

- Tiles at the top: **Templates**, **Active programs**, **Clients enrolled** and **Avg progress**.
- Filters: `All`, `Published`, `Draft`, `Archived`, and a search box.

2 Create a program

1. Click `New program`.
2. Enter the **Program name** and a **Description**.
3. Add **Goals** (press Enter or a comma after each one).
4. Choose an **Accent colour** and a **Category** (or add your own).
5. Set the **Duration** in weeks or days (up to 104 weeks).
6. Click `Create`. The program opens so you can add details and tasks.

3 Add tasks

1. Open the `Tasks` tab.
2. Type the task, for example "30-min walk".
3. Choose the **type** (task, activity, nutrition, habit, check-in) and how often it repeats: **daily**, **weekly** or **once**.
4. Optionally give it a **Phase** (for example "Detox" or "Booster") to group tasks.
5. Click `+`. Repeat for every task.

GOOD TO KNOW

Tasks cannot be edited after adding; delete it and add it again with the change.

4 Fill in the program details

The `Details` tab has sections for Basics (tagline, cover image, difficulty), Overview, Audience, Eligibility, Outcomes, Roadmap (phases), Deliverables & Support, Internal notes and Publish. Click `Save changes` in the bar at the bottom when you are done.

- **Visible to clients:** show the program in your clients' app.
- **Allow enrollment:** let clients join it themselves.
- **Maximum enrollments:** an optional limit on how many can join.
- **Featured program:** highlight it for clients.

5 Publish the program

Click `Publish` once the program has at least one task. Published programs can be assigned and, if allowed, joined by clients. `Archive` takes a program out of use without deleting its history.

6 Assign it to one or many clients

1. On the program, click `Assign`.
2. Search and tick one or several clients.
3. Click `Assign`.

- Clients already on this program are greyed out and marked **Assigned**, so nobody is added twice.
- Each client starts today and finishes after the program's duration.
- See everyone on the program in the `Clients` tab, with their progress. The remove icon takes a client off (they can be assigned again later).

7 Editing a program clients are already on

- **Adding or removing tasks** on the template updates every client currently on it automatically. Tasks they already completed keep their history.
- `Re-sync now` forces the update immediately.
- **Changing details** (name, duration, description) does not change clients who are already enrolled.

> GOOD TO KNOW
> If you delete a task and add a changed version, clients lose the history of the deleted one.

8 How progress is calculated

Progress = tasks completed ÷ tasks that were due since the client started.

- A **daily** task is due once each day.
- A **weekly** task is due once each week.
- A **once** task is due on its date.
- A finished program shows 100%.

9 Program chat

The `Chat` tab is a group chat with everyone on the program. Use it for motivation, reminders and group announcements.

> GOOD TO KNOW
> Clients on the program can see each other's messages in this chat. For private conversations use Messaging.

Meal plans

Create a weekly meal plan for each client, with your own meal times, accurate nutrition from the food library or AI, and a branded PDF to share.

Where to find it: Clients → open a client → Meal plan tab

IN SHORT

Each meal plan covers one week (Monday to Sunday) for one client. You build it as a draft, then publish it. Clients only ever see published weeks.

IN THIS GUIDE

1 Start a plan
2 Your meal times
3 Add a meal
4 Pick meals from the library
5 Estimate with AI
6 Extra nutrient columns
7 Draft a whole week with AI
8 Notes, publishing and duplicating
9 Share as PDF or Excel

Updated 12 October 2026 · nusi.in

1 Start a plan

1. Open the client and go to the Meal plan tab (or click Meal plan on their summary in the Clients list).
2. Click Start week 1. The week starts next Monday (or today if it is Monday).
3. Use New week to add more weeks. The **Week N** chips switch between weeks; a dot shows whether each is a draft or published.

2 Your meal times

The plan is a grid: meal times down the side, the 7 days across. Meal times are the same for **all** your clients.

- Default meal times: Breakfast, Mid-morning, Lunch, Evening snack, Dinner.
- **Rename** a meal time: click its name (for example "First meal", "Mid snack", "Last meal"). Use "<standard name>" changes it back.
- **Hide** a meal time you don't use: click its name, then Hide. It disappears for every client.
- Add slot brings back other meal times: Cleansing water, Early morning, Mid-breakfast, Evening snack 1 and 2 and more.

GOOD TO KNOW

You cannot hide a meal time that already has meals in this week, or the last remaining meal time.

3 Add a meal

1. Click + in the right day and meal time.
2. Choose Type it to write the meal yourself, or From library to pick it.
3. Fill in **Meal**, **Qty** (a number, e.g. 2) and **Unit** (e.g. katori, g).
4. Fill in **kcal** and **Macros**: Protein, Carbs, Fat and **Fibre** (in grams).
5. Optionally add a **Note for the client** and the **Ingredients** (bullets and bold work).
6. Click Add meal.

TIP
Click an existing meal to edit it (Save) or Remove it. If you close the form with unsaved changes, NUSI asks before discarding them.

4 Pick meals from the library

- **My foods:** meals you typed before; they are saved automatically for reuse.
- **Your recipes:** your published recipes.
- **Food library:** thousands of foods (type at least 2 letters). Calories, macros and other nutrients fill in automatically for the standard serving.

GOOD TO KNOW
Changing the quantity does not recalculate the nutrients automatically. Update the numbers if you change the portion.

5 Estimate with AI

1. Type the meal name (for example "2 ragi dosa with sambar").
2. Click Estimate with AI .
3. Calories, protein, carbs, fat, fibre and your extra nutrients are filled in, with the message "Filled in by AI. Check the numbers, then click Save to keep them."
4. Check the values and click Save .

GOOD TO KNOW
Each estimate uses one AI credit. AI values are estimates; always check them.

6 Extra nutrient columns

Besides calories, protein, carbs, fat and fibre, you can track any nutrient you need (sodium, iron, vitamin D…).

1. In the meal form, click Add nutrient .
2. Choose one **From the food database**, or create **Your own** with a name and unit.
3. The new column appears for every client and meal (up to 12 columns).

TIP
Removing a column (×) hides it everywhere; values already entered are kept and come back if you add the column again.

7 Draft a whole week with AI

1. Click AI draft .
2. Choose the **Meal slots to fill** and optionally write guidance in **Anything to steer it?** (e.g. "vegetarian, low GI, South Indian").
3. If the week already has meals, decide whether to replace them.
4. Click Generate draft . The result is always a draft for you to review.

GOOD TO KNOW
Check allergies and medical conditions before publishing an AI draft. The AI draft button is greyed out if AI is off for your practice (Settings → AI).

8 Notes, publishing and duplicating

- **Nutritionist's notes:** general guidance for the week. Saved when you click away; shown to the client and printed on the PDF.
- Publish to client : the client can now see this week in their app (needs at least one meal). Unpublish hides it again.

- **Duplicate**: copies the week to the following Monday as a new draft.
- **Delete**: removes the week and its meals.

> GOOD TO KNOW
> Clients see the published week covering today, or the latest published week. Drafts are never shown to clients.

9 Share as PDF or Excel

- **PDF**: a branded plan with your logo, a cover, the client's profile, day-by-day tables, a weekly nutrition summary (calories, protein, carbs, fat, fibre) and your notes.
- **Excel**: two sheets, the week grid and a list of all meals.

NUSI

USER GUIDE · PART 7 OF 17

Assessments

Build questionnaires or use ready-made templates, send them to clients, and review their answers in one inbox.

Where to find it: **Assessments** in the left menu (under Clients)

IN SHORT

Assessments are forms your clients fill in from their app: intake forms, diet recalls, food diaries, follow-ups, lab results and more. Answers come back to you for review, and your client sees your review note.

The number next to **Assessments** in the menu shows how many answered forms are waiting for your review.

IN THIS GUIDE

1 The Assessment forms page
2 Use a ready-made template
3 Build your own form
4 Send a form to clients
5 The Client answers inbox
6 Review a client's answers
7 How the score works

Updated 12 October 2026 · nusi.in

1 The Assessment forms page

- **Client answers:** your inbox of forms clients have sent back.
- **Ready-made templates:** forms you can copy and use straight away.
- **Your forms:** the forms you have built or copied, as drafts or published.
- **New form** (top right) starts a blank form.

2 Use a ready-made template

1. Filter by type with the chips (**All**, **Intake**, **Diet tracking**, **Follow-up**, **Clinical**).
2. Click **Preview** to see every question, or **Use template** to copy it.
3. The copy appears in **Your forms** as a **Draft**. Check it, change anything you like, then click **Publish**.

Template	Type	Time to fill
General Nutritional Assessment	Intake	about 20 min
Quick Intake	Intake	about 3 min
24-Hour Diet Recall	Diet tracking	about 10 min
3-Day Food Diary	Diet tracking	over 3 days
Follow-up Review	Follow-up	about 2 min
Lab Results	Clinical	about 6 min
Food Preferences & Restrictions	Intake	about 6 min

TIP

Once added, the card shows **Added**. **Add again** makes a second copy (it asks first).

3 Build your own form

1. Click **New form** (or the **Blank form** tile).
2. Give it a **name** and, if you like, a short intro for the client.

3. Add questions. Choose a type for each: Short text, Number, Rating scale (1 to 2–10), Yes / No, Multiple choice, Checkboxes, or Table / grid (up to 40 rows × 6 columns). Use **Section header** to split the form into parts.
4. For each question you can tick **Required**, choose its width (¼ to Full), move it up or down, or remove it.
5. Check the live preview on the right.
6. Click `Save as draft`, or `Publish` when it is ready to send.

> GOOD TO KNOW
> Only published forms can be sent. Drafts show a `Publish` button instead of `Send`.

4 Send a form to clients

You can also send from a client's profile: open the **Assessments** tab and use **Assign an assessment**. It also has three built-in checks: **Health** (12 questions), **Stress** (PSS-10, 10 questions) and **Sleep** (11 questions).

1. In **Your forms**, click `Send` next to a published form.
2. Search for clients by name or email, or click `Select all`.
3. Click `Send to N`. The form appears in each client's app.

> GOOD TO KNOW
> A client who already has the form won't get a second copy.

5 The Client answers inbox

Each list shows up to 8 forms at a time, with "and N more" below.

- **To review:** forms clients have answered and sent back. Click `Review`.
- **Not answered yet:** forms sent but not filled in. Click `Remind` to open a chat with that client.
- **Reviewed:** forms you have already reviewed. Click `View` to look again.

6 Review a client's answers

1. Click `Review`. The client's page opens with their answers.
2. Read the answers and the score.
3. Write a **Review note** (up to 2,000 characters). Your client will see it.
4. Click `Mark as reviewed`. The client sees **"Reviewed by your nutritionist"** with your note.

> TIP
> You can change a note later with `Update review`.

7 How the score works

- Only **Rating scale** and **Yes / No** answers are scored. Each rating is turned into 0–100, Yes counts as 100 and No as 0, and the average is the score.
- Text, number and choice answers are not scored; read them yourself.

Score	Band
80 and above	Excellent
60 – 79	On track
40 – 59	Needs attention
Under 40	At risk

> GOOD TO KNOW
> The score treats a higher answer as better on every question. On questions where a higher answer is worse (such as stress level or daytime sleepiness), read the answer itself rather than relying on the score.

Appointments & video calls

Set your booking hours, schedule sessions, approve client requests and hold video calls right inside NUSI.

Where to find it: Appointments in the left menu (Growth and Scale Pro, and during the free trial)

IN SHORT

Appointments shows your week by the hour. Clients can request sessions from their app, and video sessions get a private video room automatically, so there is nothing else to set up.

IN THIS GUIDE

1 The Appointments page
2 Set your booking hours
3 Schedule an appointment
4 Approve client requests
5 Manage an appointment
6 Join a video call
7 Video hours on your plan

Updated 12 October 2026 · nusi.in

1 The Appointments page

- **Mini calendar (left):** coloured dots show booked days. Today is circled. Click a day to jump to that week.
- **Appointment requests:** sessions clients have asked for, waiting for you.
- **Video calls:** the video hours used this month.
- **Week agenda (right):** your sessions day by day. Use Previous week, This week and Next week. On an empty day, click + Book.

2 Set your booking hours

Click Booking hours (only the owner can change them):

- **Let clients pick from open times:** clients choose from your free slots. When off, they can ask for any time and you approve each request.
- **Working days** and **Day starts / Day ends**, with an optional **Lunch break**.
- **Start times every** 15 min, 30 min or 1 hour.
- **Gap between sessions:** none, 10, 15 or 30 min.
- **Minimum notice:** from 1 hour to 1 day.
- **Clients can book up to** 1 week, 2 weeks or 30 days ahead.

TIP

All times are Indian Standard Time. Click Save hours when done.

3 Schedule an appointment

1. Click New appointment (or + Book on a day).
2. Choose the **Client** and **Type**.
3. Choose the **Mode**: Video, Phone or In person. For Video, a private video room is created automatically.
4. Pick **When** (it must be in the future) and the **Duration** (15–240 minutes).
5. Add **Notes** if you like and click Schedule appointment.

Type	Default length
Consultation	45 min
Follow-up	30 min
Check-in	15 min
Assessment	60 min
Group session	60 min

4 Approve client requests

1. Clients tap `Book a session` in their app and send a request.
2. It appears under **Appointment requests** and in your agenda as **Request**.
3. Click `Approve` to confirm it; the client is notified.
4. Or click `Decline` and add a reason if you like; the client is told.

5 Manage an appointment

Click any appointment to open it.

- **Status:** Pending approval, Scheduled, Completed, Cancelled, No-show or Declined.
- `Reschedule`, `Mark complete`, `No-show`, or cancel with an optional reason.
- **Private notes:** only your team sees these. Click `Save notes`.
- `View profile` or `Open chat` with the client.

6 Join a video call

1. Open the appointment. `Join video` becomes active **10 minutes before** the start.
2. It shows `Join - live` until 15 minutes after the planned end.
3. Click `Copy link` if you need to share the room link.
4. Your client joins from their app with `Join video`.

> GOOD TO KNOW
> Phone and in-person appointments don't have a video room.

7 Video hours on your plan

- A call uses its full booked length the first time anyone opens it, and only once per appointment.
- The **Video calls** card shows hours used; the bar turns amber at 80%.
- When the hours are used up, new calls can't start until the 1st of next month (or you upgrade). Your client sees "Video calls aren't available for this appointment right now."

Plan	Video calls per month
Free trial	5 hours
Starter	Not included
Growth	30 hours
Scale Pro	100 hours

> TIP
> Need more hours, or on Starter? Connect your own Daily.co account in **Settings** → **Video calls**. Those calls are billed by Daily.co and don't use your plan's hours.

NUSI

USER GUIDE · PART 9 OF 17

Messaging & Team chat

Chat one-to-one with clients (text, photos, files and voice notes), and talk privately with your team.

Where to find it: Messaging and Team chat in the left menu

IN THIS GUIDE

1 The Messages inbox
2 Sending messages
3 Save time
4 Message actions
5 Team chat (staff only)

Updated 12 October 2026 · nusi.in

1 The Messages inbox

- Every client conversation in one list. Search by name, or filter All / Unread.
- The number next to Messaging in the menu shows unread messages. Opening a chat marks it read.
- Under the client's name you see **Active now** or when they were last active.
- Profile in the chat header opens the client's profile.

2 Sending messages

- Type and press **Enter** to send. **Shift + Enter** starts a new line (up to 4,000 characters).
- **Attach** a photo or file. Photos are made smaller automatically; other files must be under 1.4 MB.
- **Voice note:** click the microphone, speak, then click stop to send. Silent recordings are not sent.

3 Save time

- **Quick replies:** type a message you send often and click Save current. Click a saved reply to put it in the box.
- **Schedule send:** pick a date and time; the message goes out then, even if you are offline. Scheduled messages are listed with Cancel.
- **Summarize:** NUSI's AI sums up a long conversation.
- **Suggest replies:** NUSI's AI suggests short replies you can send or edit.

> GOOD TO KNOW
> Summaries and suggested replies use AI credits.

4 Message actions

Hover over a message to:

- **React** with an emoji, **Reply** to it, or **Pin** it to the top of the chat.
- **Edit** your own text message within 15 minutes.
- **Delete for everyone** (your own message, within 15 minutes) or **Delete for me**.

5 Team chat (staff only)

Team chat is a private space for your team. **Clients never see it.** It has two tabs:

- **Chat:** channels for your team. Click `+` to create one (for example #general). Messages refresh every few seconds. Team chat is text only.
- **Notes:** shared notes for the team. Click `New shared note`, add a title (optional) and the text, then `Add note`. Pin important notes to the top.

> GOOD TO KNOW
> Deleting a channel deletes all its messages for everyone.

Plate Vision & meal review

Clients photograph their meals, NUSI's AI estimates the nutrients, and you approve, adjust or flag each one.

Where to find it: Clients: Snap in the NUSI app. You: Nutrition → Plate review

IN SHORT

Plate Vision is included in every plan. Each photo analysis uses one AI credit from your practice.

IN THIS GUIDE

1 How your client logs a meal
2 The Plate review screen
3 Approve, adjust or flag
4 How accurate are photo estimates?

Updated 12 October 2026 · nusi.in

1 How your client logs a meal

1. In the app they tap Snap, then Use camera or Upload photo.
2. Optionally they add hints: **portion size** (small, medium, large), whether a spoon, hand or card is in the photo for scale, and a note.
3. They tap Analyze with NUSI. The result appears in a few seconds.
4. They see the dish, how sure NUSI is (**Confident**, **Fairly sure** or **Rough guess**), a calorie range and each item with its weight, which they can adjust.
5. If it's wrong, they tap Not quite right?, choose or type the dish and tap Redo with this.
6. They choose the meal time and tap Log this meal. It is sent to you for review.

GOOD TO KNOW

Each analysis, including each Redo, uses one AI credit.

2 The Plate review screen

Open Nutrition and choose the Plate review tab. Filter by **Pending**, **Flagged**, **Approved** or **Adjusted**. Each row shows the client, meal, calories and time.

- **Photo:** drag to move; scroll or double-click to zoom.
- **Plate nutrition:** where the numbers came from (a **photo estimate** or the food database), how sure the AI is, what dish it saw, calories with a range, and protein, carbs and fat.
- **Items:** each food, marked as estimate, needs review or matched.
- **Insight:** a short comment on the meal, with any flags.

3 Approve, adjust or flag

1. Look at the photo and the numbers.
2. If you like, write a note for the client.
3. Click Approve if it looks right, Adjust if the numbers need correcting, or Flag if something needs attention.
4. Your note appears for the client on their Meals page as "Nutritionist: …".

GOOD TO KNOW

`Adjust` marks the meal as adjusted and sends your note; it doesn't change the individual items. Write the correct portion or food in your note.

4 How accurate are photo estimates?

- They are a good starting point, not a measurement. Two photos of the same plate can give slightly different results.
- Portion hints and something for scale in the photo (a spoon, hand or card) make the estimate better.
- Your review is what makes the record reliable.

TIP

For packaged foods, ask clients to use `Scan` (barcode) instead. It reads the label values.

Nutrition library & recipes

Search thousands of Indian and international foods, add your own, and build recipes with full nutrition.

Where to find it: Nutrition in the left menu, with the tabs Food library, Recipes, Plate review and Products

IN THIS GUIDE

1 Where the food data comes from
2 Find a food
3 Add your own food
4 Recipes (Scale Pro)
5 Plate review

Updated 12 October 2026 · nusi.in

1 Where the food data comes from

Source	What it is
IFCT 2017	Indian Food Composition Tables (NIN / ICMR)
INDB	Indian prepared dishes
USDA FDC	US food database (international foods)
Your food	Foods you add yourself

2 Find a food

1. Open Nutrition → Food library.
2. Type in **Search by name or alias…**, or pick a category on the left.
3. Click a food to see its full nutrient panel per 100 g.

TIP

PDF downloads the list you are looking at (code, name, category and source), handy for sharing a food list.

3 Add your own food

1. Click Add food.
2. Enter the **Food name**, **Category** and **Energy (kcal per 100 g)**.
3. Optionally add **Protein, Carbs, Fat** and **Fiber** per 100 g, and a source or note.
4. Click Add food. It is marked **Your food** and can be used in meal plans. You can remove it later.

4 Recipes (Scale Pro)

1. Open the Recipes tab and click New recipe.
2. Enter the **Recipe name**, description, category and number of **Servings**.
3. Add ingredients by searching the food library, with the weight in grams, the cooking method, and whether the weight is **raw** or **as eaten**.
4. Add instructions if you like and click Create recipe.
5. Open a recipe to see its nutrition per serving and per 100 g cooked, including micronutrients.

- `Import` adds recipes from a CSV or Excel file: either a list of dish names (saved as drafts) or a full sheet.
- `Publish all` publishes all your draft recipes at once.

> **GOOD TO KNOW**
> The recipe library is part of the Scale Pro plan.

5 Plate review

The `Plate review` tab is where you check meals clients logged with a photo. See the **Plate Vision & meal review** guide.

Community & your public page

Give your clients a space to share wins and support each other, connect with other nutritionists, and get a public page for new clients.

Where to find it: Community and Public page in the left menu (under Grow)

IN THIS GUIDE

1 Community (Growth and Scale Pro)
2 Post to your practice
3 Groups (cohorts)
4 Nutritionist network
5 Your public page

Updated 12 October 2026 · nusi.in

1 Community (Growth and Scale Pro)

The first time you open Community, read the guidelines and click Accept & enter community. The top of the page shows posts, comments and how many clients are engaged. There are two views:

- **My practice:** a private feed for you and your clients.
- **Nutritionist network:** a feed shared with all nutritionists on NUSI. Your clients can't see it.

2 Post to your practice

1. In **My practice**, type in the box ("Share an announcement, a win, a question…").
2. Add a photo if you like (up to 8 MB) and a hashtag.
3. Tick **Pin to top** for important announcements.
4. Click Post.

- Clients can like and comment, and post themselves (up to 1,000 characters).
- Use a post's menu to pin, unpin or delete it.
- **Trending** and **Moderation** on the right help you keep an eye on activity.

3 Groups (cohorts)

Create a group for a batch of clients, for example "January Challenge". Clients can join or leave groups from their app. Deleting a group moves its posts to the main feed.

4 Nutritionist network

Share ideas and questions with other practitioners on NUSI. Follow people to see their posts. Everything you post here is **visible to all practitioners**.

5 Your public page

A free page for new clients at **nusi.in/your-name**, good for your Instagram bio or WhatsApp status. Open Public page (or **Settings → Public page**):

1. Choose your **Public URL slug** (the "your-name" part; it must be unique) and click Save slug.
2. Write a **Headline** (up to 120 characters) and **Bio** (up to 2,000 characters).
3. Click Add link for WhatsApp, Instagram, YouTube, your website or a booking link. Drag to reorder.

4. Turn on **Show "Join my practice"** so visitors can request to join.
5. Turn on **Publish page** and click `Save public page`.
6. Use `Copy` and `Open` to share and check it.

> **TIP**
> Get verified in **Settings** → **Verification** to show a **Verified** badge on your page.

> **GOOD TO KNOW**
> When **Publish page** is off, visitors see "not found".

Your team

Invite nutritionists, coaches and front-desk staff, decide what each person can do, and give coaches their own caseload.

Where to find it: Team in the left menu (under Account)

IN SHORT

Only the owner (and anyone the owner allows) can manage the team. Your plan sets how many people can be on it: Starter is for one person, Growth allows 5, Scale Pro is unlimited.

IN THIS GUIDE

1 Invite a team member
2 Roles and what they can do
3 Change someone's role or access
4 Give a coach their own clients
5 Team size by plan

Updated 12 October 2026 · nusi.in

1 Invite a team member

Click Invite member. In **Add a team member** choose one of two ways:

1. **Send invite link:** choose the role and click Create invite. Copy the link and send it to the person. They sign in, accept, and join your practice. The link expires in 14 days.
2. **Create login now:** enter their **Email** and a **Password** (or click Generate), choose the role, and click Create login. Copy the login link, email and password and share them with the person.

TIP

Pending invites show Link (copy it again) and Revoke (cancel the invite).

2 Roles and what they can do

Role	Can do by default
Owner	Everything, including billing, team and settings
Manager	Everything except billing
Nutritionist	Clients (view and edit, not delete), programs, recipes, messaging, appointments, AI, analytics, reports, assessments, food library, meal review, team chat, community
Assistant	View clients and programs, recipes, messaging, appointments, AI, assessments, food library, meal review, team chat, community
Coach	View their assigned clients and programs, messaging, AI, analytics, assessments, food library, meal review, team chat, community
Receptionist	View clients, appointments, messaging, assessments, food library, meal review, team chat, community
Support	View clients, messaging, assessments, food library, meal review, team chat, community

GOOD TO KNOW

Only the Owner and Managers can manage the team and settings.

3 Change someone's role or access

- Use the **Role** dropdown next to a member to change their role.
- Click Permissions to switch individual features on or off for that person.

- Click `Remove` to take someone off the team.

4 Give a coach their own clients

1. Open the client's profile.
2. In **Assigned coach**, choose the coach (or nutritionist).
3. The coach now sees that client. Choose **Unassigned (whole team)** to make the client visible to everyone again.

> GOOD TO KNOW
> Coaches only see the clients assigned to them. Owners and nutritionists see all clients.

5 Team size by plan

Pending invites count towards the limit. When the team is full, `Invite member` is greyed out with "Team seat limit reached - upgrade to add more".

Plan	Team members (incl. owner)	Managers
Free trial	5	1
Starter	1 (owner only)	0
Growth	5	1
Scale Pro	Unlimited	Unlimited

Billing & plans

Choose or change your plan, pay securely, buy extra AI credits, download GST invoices and cancel when you need to.

Where to find it: **Billing** in the left menu (owner only)

IN SHORT

Billing is for the practice owner (or a team member the owner has given billing access). All prices include 18% GST, and you get a GST invoice with every payment.

IN THIS GUIDE

1 The plans
2 The Plans & usage tab
3 Choose a plan and pay
4 Upgrade or downgrade
5 Buy extra AI credits (Top-ups)
6 Invoices
7 Cancel your subscription
8 If a payment fails

Updated 12 October 2026 · nusi.in

1 The plans

- **Starter:** client app, programs, weekly meal plans, food diary, AI Plate Scanner, barcode scanner, habits and goals, chat, progress reports and PDFs, reminders.
- **Growth adds:** online booking, video consultations, the AI Nutrition Assistant for clients, comprehensive assessments, community groups and analytics.
- **Scale Pro adds:** recipe library, multi-branch organisation, revenue analytics, audit logs, API access and white-label branding.

	Starter	Growth (recommended)	Scale Pro
Monthly	₹3,999	₹8,999	₹19,999
Yearly (2 months free)	₹39,999	₹89,999	₹1,99,999
One-time setup fee	₹4,999	₹9,999	₹24,999
Clients	100	500	Unlimited
Team members	1	5	Unlimited
AI credits / month	500	5,000	25,000
Storage	5 GB	50 GB	200 GB
Video calls / month	-	30 hours	100 hours

2 The Plans & usage tab

- The top strip shows your **Current plan**, the renewal or trial end date and days left.
- **Plan usage** shows Clients, AI credits this month, Team seats and Storage, each against your limit.
- Switch between **Monthly** and **Annual** prices with the toggle.

3 Choose a plan and pay

1. Choose **Monthly** or **Annual**.

2. Click `Pay for Starter` (or Growth or Scale Pro).
3. A summary opens: what the plan includes, its AI credits and video hours, the price, the one-time setup fee, the GST included and the **Due today** total.
4. Click `Continue to payment`.
5. Pay in the secure Razorpay window with UPI, card or net banking.
6. You see "Welcome to … Your subscription is active." Your new limits apply straight away.

> GOOD TO KNOW
> UPI and card payments renew automatically each month or year.

> GOOD TO KNOW
> The setup fee is charged only once, with your first payment. If you paid part of it on an earlier plan, you pay only the difference.

4 Upgrade or downgrade

- **Upgrade:** click `Upgrade` on the higher plan. You pay only the balance for the days left in your current period (no second setup fee). Click `Confirm upgrade`.
- **Downgrade:** click `Downgrade` on the lower plan. Nothing is charged now; the change takes effect at your next renewal. Click `Confirm downgrade`.

5 Buy extra AI credits (Top-ups)

Click `Buy` on a pack and pay. The credits are added immediately and last 30 days.

Pack	Price
1,000 AI credits	₹999
5,000 AI credits	₹3,999
20,000 AI credits	₹9,999

6 Invoices

- Open the `Invoices` tab to see **Lifetime paid**, **Settled** and **Outstanding**, and every invoice.
- Click `PDF` to download a GST invoice for your accounts (CGST + SGST within Tamil Nadu, IGST for other states).
- **Billing activity** lists payments, renewals and reminders; `Mark all read` clears them.

> TIP
> If your practice is GST-registered, your accountant can use these invoices to claim the GST back.

7 Cancel your subscription

Click `Cancel at cycle end` at the top of the Billing page. You keep your plan until the end of the period you paid for; nothing more is charged.

8 If a payment fails

A banner **"Payment failed – update your card"** appears with `Fix payment`. You have 14 days to fix it; after that the practice moves to trial limits until a payment goes through.

NUSI

USER GUIDE · PART 15 OF 17

Reports & Analytics

Create polished PDF reports for a client, a program or your whole practice, and see how your practice is growing.

Where to find it: Reports and Analytics in the left menu

IN THIS GUIDE

1 Reports: what you can create

2 Create a report

3 Analytics (Growth and Scale Pro)

Updated 12 October 2026 · nusi.in

1 Reports: what you can create

Report	For	What it contains
Client Health Report	One client	Profile, program and goals, compliance and assessment scores, meal patterns and nutrients. Good for sharing with the client or their doctor.
Client Monthly Summary	One client	A one-page monthly recap: wins, adherence and streaks.
Program Performance	One program	Enrolment and drop-off, average adherence and completion, common sticking points.
Workspace Digest	Your practice	The last 30 days across your whole practice.

2 Create a report

1. Open Reports.
2. On a template card, click Generate.
3. Choose the client or program if asked.
4. The PDF downloads, branded with your logo, and is added to your report history.

- **History** lists every report you made, with filters All, Ready and In progress.
- Downloading again rebuilds the PDF with the latest data. Reports you no longer need can be deleted.

GOOD TO KNOW

The Billing & GST report, scheduled reports and custom reports are coming soon.

3 Analytics (Growth and Scale Pro)

Open Analytics to see **Practice intelligence**:

- **Clients, Active (7 days), Programs** and your plan's monthly cost.
- **Client growth** and **Daily active clients** over 30 days.
- **Client engagement:** engaged versus dormant clients this week.
- **AI usage** over 14 days and **Program performance**.
- **Operations:** appointments upcoming, completed and cancelled; assessments sent, submitted and waiting for review.
- **At-risk clients:** no meal logged in 10 days or more.

TIP

Export report downloads the analytics as a PDF. Revenue analytics (trend and plan breakdown) is part of Scale Pro.

Settings

Your practice details, public page, verification, WhatsApp, AI, video calls, notifications, security and data, all in one place.

Where to find it: Settings in the left menu

IN SHORT

Settings has a tab for each area along the top: General, Public page, Verification, Integrations, AI, Video calls, Notifications, Security and Data & privacy.

IN THIS GUIDE

1 General
2 Public page
3 Verification
4 Integrations: WhatsApp
5 AI
6 Video calls
7 Notifications
8 Choosing what reaches you
9 Security
10 Data & privacy

Updated 12 October 2026 · nusi.in

1 General

Click Save changes after editing. The panel on the right shows **What clients see**.

- **Logo:** Upload photo or Change or remove. It appears in the client app, on invoices and on every PDF.
- **Your name, Practice name, Contact email, Phone.**
- **Timezone:** used for your dashboard clock and dates.
- **Dashboard quote:** a personal line on your dashboard (leave empty for a rotating quote).
- **Language:** English or தமிழ் (Tamil). It changes straight away, just for you.

2 Public page

A simple public page for new clients (like a link in your Instagram bio), at **nusi.in/your-name**.

- **Public URL slug:** the end of your link. **Publish page** turns it on or off.
- **Show "Join my practice":** adds a button that uses your join link.
- **Headline, Bio** and **Links** (your website, Instagram, YouTube…).

3 Verification

1. Fill in **Professional details**: legal or business name, professional title, qualifications, registration or licence number and years of experience.
2. Add **PAN** (and **GSTIN** if you have one).
3. Upload **Supporting documents** (certificates, under 15 MB each).
4. Click Submit for verification. The status shows **Under review**, then **Verified practitioner**, or **Needs attention** with what to fix.

TIP

Verified practices get a badge on their public page, which helps new clients trust you.

4 Integrations: WhatsApp

1. Click `Connect` next to WhatsApp. A QR code appears.
2. On your practice phone, open **WhatsApp → ⋮ (or Settings) → Linked devices → Link a device**, and scan the QR code.
3. Once connected, click `Send test` to check it works.
4. Turn on **Send client reminders on WhatsApp** to send appointment and meal plan reminders from your own number.

> GOOD TO KNOW
> Developer **API keys** (for connecting your own tools) are part of Scale Pro.

5 AI

- AI comes with every plan: Plate Vision, voice notes, AI meal plan drafts, Estimate with AI and the client AI assistant. Each AI action uses one credit.
- When the month's credits run out, AI pauses until the 1st of next month, or until you buy more in Billing → Top-ups.
- **Your own key (optional):** `Connect your own AI key`, choose Google Gemini or OpenAI, paste the key, `Save & test key`. Credits still count.
- **Client AI assistant:** turn it on or off for your clients and set how many questions each client can ask per day.

6 Video calls

- Shows the video hours used this month against your plan (trial 5 h, Growth 30 h, Scale Pro 100 h; Starter has none).
- **Use my own Daily.co:** paste your Daily.co API key and click `Save & test key`. Your calls then run on your own Daily.co account, which bills you directly, and do not use your plan's hours.

7 Notifications

Browser notifications on this device: click `Turn on` to get notified about new clients, join requests, bookings, messages and answered assessments, even when NUSI is closed. Do this on each computer or phone you use.

> GOOD TO KNOW
> If notifications are blocked, click the lock icon next to the address bar, allow Notifications, then reload the page.

8 Choosing what reaches you

Click the bell in the top bar to see recent notifications (`Mark all read` clears them). The **Notifications** page lets you decide, for each event, whether it comes as a browser push, on WhatsApp or in-app:

- New client message, client gone silent (3+ days), meal photo needs review, assessment submitted, community mention or reply.
- Failed payment, subscription renewed, trial ending in 7 days, team activity, weekly workspace digest.
- **Quiet hours** (default 10 PM – 7 AM) hold push and WhatsApp notifications until morning. In-app notifications still appear, and urgent ones (client gone silent, failed payment) always come through.
- `Send test push` checks that notifications reach this device.

9 Security

- **Change password:** enter your current password and the new one twice, then `Update password`. Or use `Reset via email`.
- **Active sessions:** see where you are signed in and `Sign out` any device you don't recognise.

GOOD TO KNOW

Two-step sign-in (2FA) is not available yet. To close your practice and delete its data, contact NUSI support.

10 Data & privacy

- **Storage:** how much space your practice uses.
- **Download client records (PDF):** `Download all` saves every client's complete record as a PDF, together in one ZIP file. Keep it as your own backup.
- **Export workspace data:** `Generate export` downloads all your practice data as a JSON file.
- **Retention policy:** how long client records, messages and backups are kept.
- **Client data requests:** record a client's request for a copy or deletion of their data (to be completed within 7 days).

What your clients see (the NUSI app)

How clients join your practice, log their meals with a photo, follow their plan, answer forms, book sessions and chat with you.

Where to find it: The NUSI app on the client's phone (or the client portal on nusi.in)

IN SHORT

Knowing the client side helps you guide new clients. Everything they do arrives in your NUSI account straight away.

IN THIS GUIDE

1 Joining your practice
2 First-time setup
3 The app's main tabs
4 Logging a meal with a photo (Plate Vision)
5 Meal plan, programs and habits
6 Assessments
7 Appointments (Growth and Scale Pro)
8 Their settings

Updated 12 October 2026 · nusi.in

1 Joining your practice

1. You send them your join link (Clients → `Share join link`), or create their login yourself (Clients → `Add client`).
2. With the link: they open it, enter **Your name**, **Email** and a **Password**, and tap `Create account & request`. If they already have an account they tap `Request to join`.
3. They wait on a "pending" screen until you approve them (unless you imported their email, in which case they join straight away).
4. In the app they can also paste the invite link.

2 First-time setup

The client answers a few questions: age and gender, height and weight, their goals ("What's driving you?"), activity level, and health notes (allergies, medical conditions, food preferences). Then `Finish & enter portal`. These answers fill the **Profile & health** card on their profile in your account.

3 The app's main tabs

- **Today:** their day at a glance.
- **Meals:** log meals with `Snap` (photo with AI), `Scan` (packaged food barcode) or `Plan` (today's meals from your plan).
- **Assistant:** the AI nutrition assistant (Growth and Scale Pro, if you turned it on).
- **Progress:** weight, measurements and trends.
- **Chat:** messages with you.
- **More:** habits, journal, meal plan, goals, programs, assessments, recipes, measurements, progress photos, files, appointments, community, settings and more.

4 Logging a meal with a photo (Plate Vision)

1. Tap `Snap`, then `Use camera` or `Upload photo`.
2. Optionally add hints: portion size, something for scale, or a note.

3. Tap **Analyze with NUSI**. The foods and nutrients appear.
4. If something is wrong, tap **Not quite right?**, correct it and tap **Redo with this**.
5. Choose the meal time and tap **Log this meal**.

> GOOD TO KNOW
> The meal and photo arrive in your account marked as a photo estimate. Each analysis uses one of your practice's AI credits.

5 Meal plan, programs and habits

- **Meal plan:** shows the week you published. Until you publish one, it says "No meal plan yet".
- **Programs:** the tasks of their program to tick off each day; this drives the progress you see.
- **Habits:** they create habits (e.g. "Drink 2L water") and tick them off daily.

6 Assessments

When you send a form, it appears in their app. They tap **Start**, answer and submit. After you review it, they see **"Reviewed by your nutritionist"** with your note.

7 Appointments (Growth and Scale Pro)

1. They tap **Book a session**, choose the **Type** (Consultation, Follow-up, Quick check-in, Assessment, Group session), the **Mode** (Video, Phone, In person), the time and a note.
2. They tap **Send request**. It shows "Awaiting confirmation" until you approve it.
3. At the time of a video session, **Join video** appears. **Withdraw** cancels a request.

8 Their settings

Clients can update their profile, goals and health details, and change their password (with their current password, or with a reset link by email).
